UNIVERSITY OF WASHINGTON  
SCHOOL OF FISHERIES  
SEATTLE, WASHINGTON  
Applied Fisheries Laboratory

September 1, 1948

Mr. Carroll Wilson  
General Manager  
U. S. Atomic Energy Commission  
Washington, D.C.

Dear Mr. Wilson:

During the past two months the Atomic Energy Commission under its Contract No. W-28-094-eng-88 with the University of Washington conducted a biological resurvey of Bikini Atoll and a survey of Eniwetok Atoll.

We who took part in the expedition wish to extend our sincere appreciation for the fine support we received.

We are especially indebted to Dr. Shields Warren and Dr. John Z. Bowers of the Division of Biology and Medicine and members of their staff for handling the many phases of the operation in Washington.

In the Naval Department we should like to thank Captain J. S. Russell, U.S.N. for his support. Captain John Vest, U.S.N. and members of his staff on Kwajalein Island, provided facilities for operations in that area. Lieutenant J. J. Schmidt, U.S.N. in the capacity of Navy Liaison Officer, carried out his assignment in a masterful fashion.

We are truly appreciative of the efforts of these men in aiding us to conduct the field studies necessary to the understanding of the complex problems associated with atomic energy and biological systems.

Sincerely yours,

/s/ Lauren R. Donaldson
